GYSC - Global Young Scientists Challenge is a competition for talented young people who are not indifferent to the world around them and want to improve it.

GYSC gives young innovators & inventors a chance to present their ideas to an international jury panel, which will evaluate their work and give feedback for further development. We believe that every young person who takes the initiative to change the world for the better deserves a prize, and hence each participant will receive an award. The best solutions will be presented with gold medals and special prizes awarded by the jurors.

GYSC participants will have the opportunity to present their ideas to the jurors online. The most exciting ideas and their creators will be invited to an Instagram Live interview to talk about themselves, their ideas, and gain popularity.

At **GYSC**, the young innovators and inventors worldwide get a chance to have a new perspective about the innovations and explore new problem-solving approaches.

Knowledge

Learn from your fellow innovators around the world

Recognition

Be one of the top young innovators in the world

Networking

Get a chance to interact with people worldwide

Awards

Receive prestigious awards and showcase your talent

Validation

Get valuable feedback and validation for your innovations & inventions

Outreach

Reach out to international markets and explore new possibilities

The Application deadline to register innovations on **GYSC** is **December 10th 2020**.

We are looking forward to your participation and hope you will become a part of this fantastic journey.
